The Right Data…Right Now.

Unite SAP and Microsoft platforms for more accurate and timely decisions

STOP WORKING FOR YOUR DATA MAKE YOUR DATA WORK FOR YOU

When you're making a decision that will determine your company's future, you can't afford to get bogged down searching for a needle of critical information in a haystack of business data. Neudesic's CountERPart for SAP Analytics integrates your SAP system with Microsoft's business intelligence platform to give you quick and easy access to all your business data. Using familiar tools like Excel and SharePoint, CountERPart for SAP enables you to view, analyze, publish, report and share information across your enterprise in near real time.

"With Neudesic's CountERPart for SAP, we've been able to provide access to multiple data sources, so our associates now have visibility to vital performance information, which greatly improves our organization's decision making capabilities."

- Dean Snyder, Manager of Web Services, Louisville Gas and Electric

TAKE CONTROL OF YOUR BUSINESS DATA

CountERPart for SAP Analytics is an easy-to-use integration solution that brings SAP and non-SAP data together so you can:

• Get a clearer view of your business system and processes
• Empower your people with self-service analytics
• Maximize your investment in Microsoft BI and SAP technologies

NEUDESIC SOLUTIONS FOR SIMPLIFIED DATA MANAGEMENT

SAP Reporting

Connect to and report from SAP ERP and SAP Business Warehouse without the need for a data mart or data warehouse. This solution is ideal for SAP users that require pure reporting capabilities from SAP. Not designed for creating a data warehouse (DW).

Data Warehouse Builder

Get a complete view of your organization by combining data from SAP BW, LOB applications, and other sources into a single DW. This solution is ideal for SAP users that want to create a new data warehouse or expand an existing one. Works best where combination of data from multiple sources is needed. Requires existing SAP BW.

Business Marts

Gain additional insight from SAP by extracting module-specific data to populate Microsoft SQL Server and create an information system using Microsoft's BI platform. This solution is ideal for SAP users that want to create a new DW or expand an existing one. Works directly with data extracted from SAP ERP. SAP BW not required.

EXCLUSIVE CONFERENCE OFFER

Onsite architectural design and project scoping session

• Neudesic CountERPart for SAP Analytics software license
• Installation and configuration of software
• Two PerformancePoint Services dashboards / scorecards
• Four SQL Server Reporting Services / Power View reports
• One Excel / PowerPivot workbook

For more information, email CountERPart@neudesic.com or contact Tim Corken at (303) 248-8321

"Neudesic's CountERPart for SAP enables us to eliminate our labor-intensive reporting processes and refresh our financial system up to 10 to 12 times daily. Now we can easily view real time interactive dashboards and reports in the Microsoft BI platform with data queried from SAP BW."

- Helge Hoehn, Senior Expert SharePoint and Project Manager, Fresenius Netcare
