Collaboration at Every Turn

Creating a more connected,
mobile and intelligent enterprise

REALIZE A FULLY INTEGRATED SHAREPOINT EXPERIENCE ON-PREMISE OR IN THE CLOUD

Whether you choose on-premise security or cloud flexibility, a true enterprise collaboration experience hinges on how well you integrate your business systems with the collaborative, social, mobile, search and analytics capabilities of SharePoint 2013. With an eye on quality and a reputation for results, Neudesic Portals and Collaboration specialists deliver comprehensive solutions that leverage the power of SharePoint to enhance productivity and drive future business innovation.

"We've been partnering with Neudesic since 2006, and they deliver value and demonstrated results. In addition to being highly skilled and knowledgeable, they also have very effective management and development methodologies."

- Jon Grunzweig, Chief Information Officer, Majestic Realty Co.

OVERCOME CHALLENGES TO SHAREPOINT IMPLEMENTATION

- Identify and prioritize key business objectives
- Establish IT and end-user collaboration
- Manage lengthy project timelines
- Provide adequate end-user training
- Drive user adoption

MAKING SHAREPOINT WORK IN THE CLOUD

Transitioning to the cloud reduces operating costs, makes systems more scalable, and improves IT efficiency. But what should you do with your SharePoint environment?

- Do you go with a public, private or hybrid solution?
- Should you move everything or just certain systems?
- What are the potential problems that might arise?
- Are there any security issues you should be aware of?

At Neudesic, our experience with SharePoint is rivaled only by our knowledge of Windows Azure, so we can answer all your questions about SharePoint in the cloud.

PROOF OF CONCEPT OFFER

Neudesic's SharePoint 2013 Private Cloud Proof of Concept offer will show you how leveraging Infrastructure as a Service reduces your hardware costs and creates a more scalable and redundant environment. Using your software keys and Azure subscription, Neudesic will set up and configure:

- 1 Active Directory Domain controller Virtual Machine
- 1 SQL Server 2012 Virtual Machine
- 1 SharePoint 2013 Server Virtual Machine
- 1 SharePoint Office Application Server Virtual Machine

For more information, please contact Tim.Corken@neudesic.com or (303) 248-8321

NEW IN SHAREPOINT 2013

- Enterprise search
- Mobilization
- Social capabilities
- Reporting
- Records management
- E-Discovery
- Business process automation
- Application and product catalogs
- Work management
- Machine translation for multi-lingual sites

PULSE — NEUDESIC
EXTENDING COLLABORATION ACROSS THE ENTERPRISE

Make SharePoint come alive with Neudesic Pulse, enterprise collaboration software that seamlessly integrates with SharePoint, Office 365 and other line-of-business applications.

Integrating Pulse with SharePoint on-premise enhances business productivity by allowing your employees, customers and partners to collaborate in a secure and feature-packed environment.
